Reference from: Vanja Podhradski - Master Civil Engineering, Project Manager for Motorway Construction in JPAC. Bosnia and Herzegovina who attended ECV Module 2-1 in April 2022

The Practical Application of the 2017 FIDIC Conditions of Contract (Module 2-1) organized by ECV in cooperation with CCM is one of the best courses designed for FIDIC users who want to expand their understanding of the FIDIC Contracts in general. Through excellent lectures (by highly competent lecturers), the course carries you through major sub-clauses of the GCC (second edition 2017). Difference in content between 1999 edition and 2017 edition is emphasized and thoroughly explained so that participants can comprehend subtle differences introduced in later editions. The Course is designed in a way that keeps participants' attention constantly involved in discussion on the procedures and principles of the GCC through well picked examples presented in work exercises. Work exercise is created in a way that challenges participants' prior knowledge of FIDIC and highlights the necessity to read the conditions thoroughly and repeatedly. In conclusion, this course has excellent methodology and work materials as well as experienced lecturers that are willing to transfer their “know how”. It is highly recommended.
